MAY VOTE BONDS TO FINISH PAVING OF ARTERIAL STREETS

EXISTING PAVEMENTS WILL BE LINKED UNDER NEW PLANS TAKEN UP BY CITY COUNCIL TUESDAY NIGHT.

A new project for the completion of the paving on the arterial streets of the city was submitted to the council by Mayor Wolfe Monday night and the first step taken towards carrying it into effect. The plan provides for the linking up of all existing pavements under one big contract, to be financed by the issuance of general bonds of the city. At Monday night's session the street and alley committee was authorized and directed to engage the services of a competent engineer to prepare plans, specifications and estimates of cost for the entire project, detailed as to each section, same to be ready for the next meeting of the council. As soon as this data is at hand steps will be taken to call a special election to submit to the people the proposition of issuing general bonds of the city in an amount sufficient to carry the project to completion.

The project under consideration calls for the laying of a 16-foot roadway on A street from the railroad right of way to Main street; a 16-foot pavement on Main street from the Odd Fellows hall to the Herald office; the paving of Main street for its full width from the Herald office to Thompson street; a 16-foot roadway on Thompson street from Main street to the Baker river bridge; a 14-foot roadway on the east side from the end of the bridge to the end of the present paving; the paving of Aldridge street for its full width from Main street to connect with the present pavement on Mill street, and the construction of a 14-foot roadway on Garden street from the end of the present pavement to Shuksan street in Crofoot's addition. It was estimated that the work would cost approximately \$15,000. It is the plan of the council to submit the matter to a vote of the people, and if approved to go ahead with all preliminary work during the winter months so as to have everything ready for the calling of bids for the improvement by early spring.

The reason that the general bond issue is favored rather than the creation of improvement districts is that the projects contemplated are all of more general benefit to the public at large than to the abutting property and in most of the cases the abutting property receives no direct benefit. Also it would require four or five separate districts to carry through the complete project, greatly increasing the expense and probably doubling the total cost. It is the only feasible plan that has been advanced for the completion of the city's paving within a reasonable time and is well worthy of consideration.

Templeton, of Bellingham, delivering the sermon. About thirty ministers from this district were in attendance. At the close of the session the following resolution was presented by Dr. Templeton and was adopted: "Resolved, That we express our heartiest appreciation of the courtesy of the pastor and officers of the Mt. Baker Presbyterian church for the use of their cheerful and neatly finished auditorium for the meeting of the presbytery; to the members and friends of the congregation for their unstinted hospitality in opening their homes to entertain our members; to the ladies for the delicious and bounteous repast served in the church Wednesday; to the choir for their assistance in the music; and to all who in any way contributed to the pleasure and profit of our meetings. To the Concrete Herald for liberal space in notice of the meetings a word of recognition and appreciation is hereby spoken, and we suggest that a copy of these resolutions be accorded further space that the community may know of this action."

CONCRETE BANK SHOWS BIG GAIN IN DEPOSITS

The official statement of the State Bank of Concrete under the call of September 8, published this week, shows that the total deposits in the bank have gained \$38,334.41 since the official statement of June 30. This shows a gain of almost 25 per cent in a little over two months. The total deposits on September 8 were \$199,688.54, being just \$311.45 short of the coveted \$200,000 mark. The remarkable gain of the bank for the past year is gratifying to both the bank officials and to the community. REAY IS WINNER IN RACE FOR SHERIFF OF SKAGIT COUNTY

HAS LEAD OF 600 WITH BUT THREE PRECINCTS TO HEAR FROM—THOMPSON AND GILKEY EASY WINNERS.

The fight for the Republican nomination for the office of sheriff was the leading contest of the primary campaign in this county, and just preceding the election the race was a hot one. George B. Reay, of Mount Vernon, the present sheriff, proved the winner, having a lead of over 600 over his nearest opponent with only three small precincts to report. On the returns now in Handy is in second place with a lead of 19 over Bardsley. Gilkey had a walkaway in the race for engineer, having a majority of 200 over the combined vote of both his opponents. Richard Thompson won out for commissioner by a vote of approximately 3 to 1.

On the state ticket Lamping carried the county for governor with a vote of 1583, with 1509 for Hartley and 1228 for Hart. Jones leads for senator with 2,522 to 1793 for Inglis. Billy Conner carried the county for lieutenant governor, with Coyle a close second, the vote being 1923 to 1618. The three candidates for state treasurer were closely bunched, with Babcock slightly in the lead. For the other state offices the incumbents were in the lead with large majorities with the exception of insurance commissioner, Dwyer being given a lead of 900 over Fishback in the county.

The total vote of the county candidates, with Mansford, South Allen and one Anacortes precinct missing, is as follows:

Representative: Waugh, 2,485; Harrison, 3,224; Pearson, 2,948; Fulton, 3,498.

Sheriff: Bardsley, 1,455; Colvin, 398; Handy, 1,474; Snow, 338; Reay, 2,098; Latimer, 266.

Engineer: McKinstry, 1,543; Gilkey, 2,892; Peterson, 1,155.

School superintendent: Kerns, 1,677; Dewar, 908; Singer, 737; Ratcliffe, 2,108.

Coroner: Light, 3,251; Haugen, 1,879.

Commissioner, 3rd district: Thompson, 1,087; Buchanan, 480.

In the first district E. Van Buren, of Anacortes, won the nomination for commissioner by a small margin over J. A. Mitchell, J. T. Stevenson being a close third.

The judicial ticket and the Democratic ballots have not been counted yet, except for the office of governor. In the county Black received 139 votes and Mathes 231. The missing precincts are all small and cannot affect the result on any office.

COUNCIL PREPARES TOWN BUDGET FOR THE COMING YEAR

AMOUNT TO BE RAISED LARGER THAN FOR THIS YEAR—BILLS ALLOWED FOR MONTH OF AUGUST.

The principal item of business at the regular meeting of the council last Monday evening, outside of the paving proposition mentioned elsewhere, was the adoption of the budget of expenditures and receipts for 1921. The estimates prepared by the finance committee and tentatively adopted, subject to revision at the October meeting, shows a slight increase in the amount of money needed over the budget for 1920. Some items are decreased and others raised, the total estimated expenditures being approximately \$700 in excess of the estimates for the current year. The budget is published in detail elsewhere in this issue.

The meeting, which had been adjourned over from September 7, was called to order at the usual hour by Mayor Wolfe, with Councilmen Ireton, McGowan, Olsen, O'Connell and Rhodes present at roll call. The minutes of the last regular meeting were read and approved. The report of the treasurer for August was read and ordered filed.

The oath of office of Councilman Rhodes was filed, and he was assigned to the following committees by Mayor Wolfe: Street and alley (chairman), finance, and light and water.

The following bills were approved by the finance committee and on motion of Mr. McGowan, seconded by Mr. O'Connell, were allowed and ordered paid:

Current expense fund: Herald, printing registration notice, \$1.50; C. L. Stewart, fire marshal, \$10; library, maintenance, \$15; Geo. W. Ross, marshal, \$25; G. L. Leonard, salary and rent, \$25; Baker River P. L. & W. Co., lights and water, \$107.64.

Road and bridge fund: Wm. Day, work on streets, \$15; A. C. Burger, do., \$25; Frank Hyde, do., \$31.25; A. W. Hallock, do., \$33.25; J. J. McDougall, do., \$62.50; J. A. McKay, do., \$72.

Mr. McGowan, for the street and alley committee, reported that most of the improvement work on the new street into the Capitol Hill district was completed, and that bids would be asked as soon as weather conditions permitted for hauling gravel for the roadway. Mr. O'Connell stated that complaint had been made against water standing on the walk along the old Baker River store building, due to lack of proper drainage. The matter was referred to the street and alley committee for attention.

The new paving proposition was discussed, and on motion of Mr. O'Connell, seconded by Mr. McGowan, the employment of an engineer to start off the project was authorized. Council then adjourned.

LOW IN SCALE OF HUMANITY

Cave Dwellers in the Canary Islands Practically Live as Do the Wild Animals.

Principal cave-dwellers' settlements in the Canaries are at Atafay, in the island of Grand Canary. The name means the "Giant's burrow," and from a distance the place closely resembles a rabbit-warren or a honey-comb swarming with bees. The caves are more or less in terraces on the side of a steep rock, overlooking a plain and river bed. Atafay supplies the entire group of the Canaries with day pots, every cave having its own set of rude appliances for making pots, and the people display great industry and quickness in the work. Men, women and children squat about at the entrances to their caves, knocking the clay with their hands into elegant jars and using their finger nails to apply decorative lines.

These troglodytes, or cave dwellers, are almost like wild animals, having no morals and very little clothing to boast of. During the summer the children run about almost naked, and the women wear the shortest of skirts. They are probably the last remnants of the aborigines of Grand Canary, who are known to have lived in caves 10,000 years ago. The cave dwellers are very different from the rest of the islanders, who look upon them as pariahs and would as soon think of intermarriage with monkeys as with them.—Wide World Magazine.

THE TRUTH ABOUT EVIDENCE

Some Difference Between Its Theoretical Purpose and Its Presentation in Legal Practice.

Evidence is that portion of the truth which your lawyer thinks will impress the judge or jury in your favor. Any other portions of the same truth must therefore be irrelevant and immaterial and should not be admitted as evidence. Thus evidence is both part truth and partial truth.

The theoretical purpose of evidence is to bring out the truth, the whole truth and nothing but the truth. In legal practice, however, it is used to emphasize unduly certain portions of the truth, to color other portions so as to imply things that are not the truth and to cover up the rest of the truth.

There are several kinds of evidence. Circumstantial evidence has probably convicted more innocent parties than any other kind. Documentary evidence has no doubt convicted more guilty parties than any other kind. And counter-evidence cannot always be made to count.

Truth crushed to earth may rise again, but not if your lawyer's objections are sustained by the court. Verily the seeker after truth has no business in a modern courtroom.—Otis C. Little.

Many Believe All This.

It is unlucky to drop a tear on a letter from a friend. If you blot your paper and send it away in that condition it will find the recipient in poor health. You are sure to witness a fight if you misdate a letter. Should your letter cross in the mails one coming from your sweetheart it will cross out love. It is a bad sign to receive an unsealed communication, though the soothsayers do not say just what will happen in that event. Just contenting themselves with the expression "bad sign" and leaving you to worry as to what it may bring. Should you get a letter with the stamp upside down you will make a mistake about money that very day "as ever was." If you want to hear from some one write him a long letter with a pen, telling him everything that is weighing on your mind, then tear it up and burn the fragments. At that instant he will begin to think of you and know no peace until he has written to you. When an address is upside down it means bad luck.—Exchange.

He Sells It Twice.

"Before any one of the department managers of a big western concern places any important new policy before the president for approval, he explains the plan in full to one of the other department heads, and obtains either his approval or his disapproval," says a writer in System, the Magazine of Business. "Then if his plan is approved and he takes it to the president for his O. K., the fact that the other department head has endorsed the plan makes it easier for the president to judge, without giving too much thought to the details. Furthermore, this method decreases the number of undesirable plans, that are brought to the president's office; frequently, when one manager presents his plan to another, he is shown why it is not practicable, or how it would conflict with some fundamental policy."

Birthplace of Famous Ships.

Many famous warships were built and launched at Portsmouth, N. H., the first being the 54-gun ship Faulkland of the English navy, launched in 1690. It was followed by the Bed, 1696, and by the American in 1749, all of the British navy. The first vessel of the continental navy launched there was the 32-gun Raleigh in 1775. The second was the Immortal Ranger, from whose deck John Paul Jones received the first salute to the Stars and Stripes on February 14, 1778. The frigate Congress, sunk by the Confederate ironclad Merrimac, and the Kearsarge, which sank the Confederate steamer Alabama off Cherbourg, France, were two other famous Yankee war vessels built at Portsmouth.

ROCKPORT

Mrs. P. A. Hammer, of Sauk, was a guest at the home of Mrs. E. A. Morris last Friday.

Miss Mabel Graham, county superintendent of schools, and Miss Ethel Payne, county nurse, were visiting in Rockport last Friday.

Walter Clark has returned from Seattle and is again back on his old job at the Neil McLeod mill on Sauk mountain. The mill has been closed through the summer but is now running again.

Mr. and Mrs. Neil McLeod are the proud parents of a fine daughter, born Sunday, September 12.

Mrs. E. A. Morris spent Wednesday at Sauk visiting at the home of Mrs. Pete Hammer. Mrs. Branbun is still there, enjoying a long visit.

Mr. Black has entirely recovered from his recent illness.

Mrs. Hemrick has been on the sick list since last Friday.

The school children all like their new principal and the school work is going ahead in fine shape.

Mrs. Martin's mother, who is visiting here, has been on the sick list, but is now reported to be improving.

J. T. Cryderman, of Bellingham, was a business visitor in Rockport last Friday.

Hugo Bauman was transacting business in Mount Vernon Friday.

E. Johnson has gone to Seattle to buy some more furniture for his restaurant. Since he has had the place repaired and decorated it presents a very attractive appearance.

Mrs. Epp Shuler, who has been on the sick list, is now able to be about again.

The two Alexander children have been quite ill with summer complaint, but are now rapidly recovering.

The school directors have decided to employ another teacher, making two teachers for the Rockport school for this year.

A. W. Maxwell, of Marblemount, was in Sedro-Woolley Thursday having some dental work done.

Mr. and Mrs. Miller, who have made their home here for two years, left Wednesday for Seattle, where they will make their home.

Mrs. Hellerick spent part of last week at the home of Mrs. Edward Hanson, and will visit other old friends in this vicinity before returning to her home in Seattle.

THOUGHT KANGAROO A BIRD

Naturalist With Captain Cook Mised by Remarkable Speed Displayed by Australian Animal.

A naturalist who accompanied Captain Cook on his famous voyage around the world mistook for a bird the first kangaroo he saw.

This is not likely to surprise anybody who has seen kangaroos in their native wilds, for their leaping powers are so wonderful that at full speed they really look as if they were flying.

A scientist, speaking of this matter to the writer, said: "I chanced to come across two 'old-man' kangaroos, huge creatures, in the Australian bush, and measured the leaps of one of them. Thirty-two feet the tape line showed for each jump, taking it from toemark to toemark."

"It is marvelous to see one of those great marsupials streaking across country in immense bounds, literally throwing itself into the air with its mighty hind limbs, and hardly seeming to touch the earth in its flight."

GREATEST OF ALL VIRTUES

Gratitude Means Recognition of Amount of Good Which Has Been Bestowed by Others.

Gratitude means that memory has come to the aid of purpose, and that praise is reinforcing prayer. Gratitude links the past with the future, the debt incurred with the duty to be performed, the service received with the service rendered. The question, "What ought we to do for others?" cannot receive a proper answer until pains have been taken to weigh and value all that others have already done for us. Benevolence is largely an affair of memory and of the gratitude that memory inspires. The benevolence that is most beneficent does not begin, as some moralists seem to think, in a desire to do good to other people, but in adequate recognition of the enormous amount of good which other people have done to ourselves. Nine-tenths of what we have to give is a gift bestowed upon us, and only when this is realized does altruism rest upon its proper ground, or feel the full force of the motives which impel the individual to the service of others. Divorced from gratitude, all the social virtues would shrivel.—L. P. JACKS.

COX FOISTS FALSE SPECTER TO FORE IN CAMPAIGN TALK

No One Will Be Deceived by Democratic Attempt to Use Great President's Name.

THE PEOPLE KNEW ROOSEVELT

Death of Foremost American Has Not Dimmed His Deeds in the Minds of Patriots.

By William Hoster

May one who was more or less intimately associated with Theodore Roosevelt in the last fifteen years of his life say a word in regard to the developing tendencies of the pending presidential campaign?

Governor James M. Cox, the Democratic candidate, with increasing frequency is using the name of Colonel Roosevelt in his speeches, as of one from whom the Governor has derived his inspiration for this momentous campaign, and whose support of Mr. Cox's so-called policies would be forthcoming were Roosevelt alive. At least, Governor Cox is at pains to make it appear that it is into his hands that the torch borne by Colonel Roosevelt was entrusted when the latter passed on.

Addressing the Ohio Democratic State Convention at Columbus on August 17th, among other things Governor Cox said:

"Need I remind you that it was in this State that Theodore Roosevelt, that great American, made his speech proclaiming his creed, not that the judges alone should be recalled, but that the judicial procedure itself should be subject to recall."

Acknowledged Error.

First and foremost, no man who knew Theodore Roosevelt well, and was proud to follow his leadership, needs to be told that he lived to realize the error of that specific doctrine which Governor Cox now drags from the political limbo of dead things.

But aside from this, the one outstanding note in Roosevelt's great career was his uncompromising, tried and true Americanism. He was an American above and beyond everything else. His Americanism arose above all party considerations. He was jealous of his country's honor, proud of its traditions, zealous in the maintenance of its integrity and independence. He labored incessantly to promote that national unity which he believed to be one of the safeguards of the Republic; and his faith in Washington's Farewell Address and in the Monroe Doctrine was such that he regarded strict adherence to the injunctions of both as the two great bulwarks of our national existence. If it were necessary to prove these assertions, columns could be quoted from his writings and speeches in support thereof. But one has only to mention the name of Theodore Roosevelt to bring before the mind a picture of a United States strong, self-reliant and independent.

Roosevelt's Position Clear.

One does not have to ponder long to reach a conclusion, therefore, where Roosevelt would stand if happily he were among us today. The man who in 1910 avowed that the supreme national need was the overthrow of Wilsonism and all that Wilsonism represents would have a mighty well-defined position in the fighting today if he were with us, and he would not be ranged on the side of Governor Cox.

The man who, though age was creeping upon him, demanded as his right that he be sent across to face with the two hundred thousand men that clamored to accompany him, the German menace; and who grimly laid down the plea that by his end on the field of battle the drooping morale of the entire forces might be revived, though the death of a former President of the United States would have had little in common with a candidate whose newspapers proclaimed sixteen months after the sinking of the Lusitania that "The German U-boats have committed no crime against us."

Remember in what stirring words Roosevelt denounced the Lusitania sinking, and how, throughout all that drab period of American neutrality, his powerful voice rang through the land awakening the patriotism of our people to the culmination in April, 1917, when even Mr. Wilson finally was compelled to face the inevitable. There is no law against Governor Cox's use of Colonel Roosevelt's name. Nor is there any law on the statute books providing for the crimes which are committed in the name of progressiveness for which Colonel Roosevelt stood. There are Napoleons of finance, of wheat, of oil and of industry, but there was only one Napoleon. There are Jimmies and Edgies and Harries, but there was only one Teddy.

In the campaign upon which we have entered, the name of Roosevelt will be invoked many times in many places in behalf of many things. But few in all the great army of those who followed Roosevelt will be deceived. They know above all other things that the safety and integrity of the United States lay closest to Theodore Roosevelt's heart and with him his doctrine of staunch Americanism will prevail against any preachment of progressivism which seeks to lure them from the path of patriotic duty.

Old Version of Man's Creation.

The religious customs of the Assyrian Sumerians 5000 or more years ago is given in the fourth volume of translations of tablets in the British University museum by Dr. Stephen Langdon, who was for three years curator of the Babylon section of the university. The Sumerian tablets tell of the creation of men from clay by a woman deity. This goddess protects her creations from the flood by saving Ziusiddu (Noah), and the latter lands in Paradise and eats of forbidden fruit of his own accord. There is no Eve in this theory whatever. The Sumerians believed that ten patriarchs ruled some 300,000 years before the flood, that it was about 35,000 years thereafter before Cyrus came down and conquered the kingdom. The historical tablets at the university and some are the most elaborate in existence. No other records support to give such a record of human existence.

SECRETS OF SELLING

What makes men star salesmen? What was responsible for their remarkable rise to the ranks of big money-makers? What did they do to lift themselves out of the low pay rut and step up to magnificent earnings? The answer is very simple. These men decided to get into the great field of selling. They learned about the wonderful opportunities in this fascinating profession—why salesmen are always in demand—why they receive so much more money than men in other lines of work, and they became star salesmen. Now, if you would like to get some experience in this selling game, we would like very much to start you in the field with one of our new lines, something that has never been on the market before.
