VOLUME XXXIX

CONCRETE, SKAGIT COUNTY, WASHINGTON, THURSDAY, FEBRUARY 15, 1940.

NUMBER 13

SEEN AND HEARD ON MAIN STREET

When a pastor of one church was informed that his salary had been increased to \$200 a month, he refused to accept it on the grounds that his present wages were already

hard enough to collect.

It takes one-fortieth of a second to wink your eye, the slow motion camera reveals. And sometimes it takes four hours to explain to the Missus why you did it.

Definition

WOMAN: A person who thinks you should forgive her because she isn't mad any more.

A Scotsman who wanted to learn what profession his son should enter, gave him a theological book, an apple and a sixpence.

If he found him when he returned reading the book, he intended to make a clergyman of him; if eating the apple, a farmer; and if interested in the money, a banker.

When he did return, he found the boy sitting on the book, with the sixpence in his pocket and eating the apple. "That settles it," said the Scotsman. "The lad's a born lawyer."

Lena Genster's boy friend has trouble with his vision. He's always seeing parking spots before his eyes.

He is said to have a good head on his shoulders and a different one every night.

The Army doctor looked at the youth's feet and rejected him. "You couldn't possibly stand the long marches," he explained.

The would-be soldier burst into tears.

"Why are you so upset?" asked the medical officer.

"Well, sir," replied the youngster, "I walked 217 miles to get here. . . and I can't bear the thought of walking back."

POEM

I shot a poem into the air,
It was reprinted everywhere
From Bangor to the Rock Range,
And always credited to

—Exchange

Teacher: "It gives me great pleasure to mark you 85 on your examination."

Jimmy: "Why not make it 100 and give yourself a real thrill?"

Lena Genster says that some of her girl friends have not only admired her lovely engagement ring, but two of them recognized it.

MODERN WAR

The pilot of a "leaflet" plane reported back to headquarters two hours before he was due. His astonished commanding officer asked for an explanation.

The young pilot informed him: "Well, sir, I flew over the enemy territory as instructed and tipped out the parcels over the side."

The C. O., in an anxious voice, inquired, "Do you mean you threw out those pamphlets while they were still tied up in bundles?"

"Yes, sir."

"Why man, you might have hurt somebody!"

Definition

OLD TIMER: One who can remember when wifey sat in her corner waiting for the curling iron to heat in the lamp chimney.

The local boy is making good—he has just been made draft clerk at the bank; opening and closing the windows.

"What's good clean fun?"

"What good's clean fun?"

IF THE SHOE FITS—just put on hubby's charge account.

TO AVOID CRITICISM—Do nothing, see nothing, say nothing, know nothing.

Theatre To Install Latest Type Machine

First In County To Install
New, Improved Projection
Equipment.

Good news for the theatre goers of Concrete was the announcement this week that the Concrete Theatre had purchased complete new projection machines and sound equipment. The machinery arrived here last week end and is now being prepared for installation.

Completion of the installation will be made next Thursday, on the day there is no evening show, and the new machines, screen and loud speakers will be in readiness for a formal dedication on Friday, February 23rd. A special first-run picture, Charlie McCarthy's latest feature, has been secured for the opening.

Machines installed are the latest in sound-projection, and are said to greatly improve both the picture and sound on all films. Late improvements on films coming from Hollywood have almost rendered old style machines obsolete as far as perfect results are concerned. Manager White, of the local show house, predicts that his audience will get a real thrill from the performance of his new equipment.

The new projection equipment will be the first of this type to be installed in the county and is of the same type recently installed in one of Seattle's largest theatres.

Series Of Improvements

Installation of new machines is just one of the improvements made at the local theatre during the past year. The old wood furnace was replaced with a modern oil-burning steam-heat system, and last July the system was perfected with an air-conditioning unit. Since then gradual progress has been made on renovating and decorating.

As far as film entertainment, Manager White has been busy the past two months, using up contracted films on double-feature shows so that he will be in a position to choose from the cream of the new films during the coming year.

States Theatre Policy

With the installation of new equipment, Manager White issues a request for cooperation of his patrons for the better enjoyment of the shows, especially in regard to seating the younger children. He states: "We wish to bring to attention the policy of this theatre at this time, especially to our new arrivals and new customers. For years this theatre has maintained a low rate of student prices, which means a big saving to parents. We also have sufficient seating capacity to reserve a special section for the younger children, lower and more comfortable chairs, boys on one side of the aisle, girls on the other—and we are proud of our record in taking care of them while they are in our charge.

"As children cannot be expected to remain quiet and often wish to stand up or leave their seats, we feel that seating them in the section reserved for them will make them more comfortable and give less trouble to other patrons who might be disturbed by them in other parts of the house.

"Parents with children under the paying age limit are invited to bring them along and when seats are not in use they are at your disposal. All we ask is that you keep them as quiet as possible and relinquish the seats when needed.

"With our new equipment in operation, we ask that our patrons help us in carrying out the above regulations."

Stop & Save Store Has Open House On Saturday

The Stop & Save Grocery held open house last Saturday afternoon in celebration of their newly installed meat counter—one of the most modern types.

The new equipment and enlarged display case will allow the store to handle a greater variety of meats and fish of all types in season.

The opening was well attended and many enjoyed the free coffee and sandwiches served during the day.

At the Cross Roads

State And County Men Talk Bridge

The Faber bridge proposition was again the subject of discussion at the office of the county commissioners Wednesday, when the scheduled meeting with state road and bridge men was held. While the outcome of the meeting left the up-river folks still very much in doubt, the fact that the state and county were getting together on a plan of some kind, was held to be encouraging.

Representatives from the local Booster club were called to attend the meeting and reported back that the state men seemed to think that erecting the old Riverside bridge at Faber would be almost as costly as building a new bridge, and not as satisfactory. However, the steel of the old bridge is to be inspected carefully and a final decision made on whether or not it should be used.

The state highway department will also make an investigation of the Faber site and give their recommendations to the county on what type of bridge would be most suitable.

The Lake Shannon Shingle Co. employees and many friends enjoyed a dinner dance at the Chuckanut Shell near Bellingham, last Saturday evening.

About forty-five were present at the banquet table.

Total registration of visitors in Dry Falls State Park during 1939 was 150,112 individuals. As it is estimated that not to exceed 35 per cent of the people who actually visit the park register there, those in charge claim more than 400,000 visitors.

This they assert tops the total number of visitors to Coulee Dam in 1939, although the number visiting the dam is growing annually, and Coulee dam rates higher with out-of-state visitors than any other attraction excepting Mount Rainier.

Over the Dry Falls, in Central Washington, once roared a torrent equal to forty Nigaras. Geologically it is one of the outstanding wonders of the continent. The dry falls is of easy access to visitors, and a lecturer is on duty to explain everything.

Mr. and Mrs. Max McGowan returned to their home here last week from a several weeks' motor trip in their new Plymouth Sedan. They visited several Eastern states and Florida traveling through the southern states and following the Pacific Coast route home.

Hamilton Wins In Close Game

Concrete's hopes for a higher position in league standings at the expense of their traditional rivals, Hamilton high, went glimmering here Friday evening when a scap-py Hamilton out-fought and out-played the local boys for the second time this year. The game ended 24 to 20, after Hamilton had held a slight lead for the last three quarters. The score was tied 4-4 at first quarter.

Shannon, Hamilton forward, was high point man for his team with 10 points. Doyle led the Concrete scorers with 8, followed by Campbell with 6.

Upset of the evening was Mount Vernon's defeat by Anacortes 35 to 21. Although Mount Vernon was undefeated and had one victory over the Sea Hawks, they were given a thorough trimming. Edison also went to town Friday night in beating Burlington 47 to 18; while Sedro-Woolley defeated LaConner 35 to 19.

This week end Concrete will play at Burlington, closing the season the following week with Edison on the Concrete court.

PERKINS SETS WAGE FOR CEMENT PLANTS

A prevailing minimum wage scale for the cement, lime and allied industry workers of the state of Washington, for plants soliciting government contracts of more than \$10,000, was announced yesterday by Secretary of Labor Frances Perkins.

The new wage goes into effect on March 2 and sets the minimum as the nation's highest—70 cents per hour with a minimum of \$28 per week for 40 hours. This will not affect the local plant because of the fact that Superior has had these wages in effect for some time.

Present wages throughout the state run from 65 to 72½ cents per hour and no one will suffer from the setting up of a minimum scale. On the average it will give increases in lower wage brackets.

The ruling is to be in effect over plants at Bellingham, Grotto, Spokane, Metaline Falls, Seattle and this city—about 600 workers in all.

Grange Gavel Meeting At Local Gym Next Week

Members of the Granges at Rockport and Birdsview are busy at the present time planning and preparing for a county-wide "Gavel" meeting to be held in the Concrete Gym next Wednesday night, Feb. 21st.

Both clubs are working on drills and entertainment for the program to be presented that evening for the entertainment of visiting members of the organization from other parts of the county.

C. E. Tumleson In Race For School Director

First Candidate In Field—
Two Directors To Be El-
ected on March 2nd.

C. E. Tumleson of Van Horn was first in the race for the positions of school director to be filled at the coming election to be held on March 2nd. Mr. Tumleson filed his candidacy this week for the post now held by Elmer Larson of Sauk.

There are two directors to be elected this time, one from the Van Horn and Sauk district and one from the East Concrete district. So far neither Larsen, or George A. Campbell retiring directors, have filed for re-election.

Filings will be open until Feb. 20th for candidates whose names will appear on the ballot. Others desiring to make the race after that date will have to run as "sticker candidates."

Registration books close this evening and there can be no more registrations until after election, with the one exception that registrations of persons moving here from another district may be transferred legally up to election day.

Voting will be held at the school as usual, with polls open from 1:00 to 5:00 p. m. on election day—Saturday, March 2nd.

All voters must be registered to be entitled to a ballot.

Tri-County Firemen Elect Hooton As New President

Concrete Volunteer Fire Dept. played host to the Tri-County Fireman's Association Wednesday evening with a turkey and dressing banquet held at the old drug store building.

Principal subject of the evening was election of officers, the local group being honored by the election of Wm. A. Hooton as president of the Tri-County Ass'n. for the coming year. Wm. Ropes of Sedro-Woolley was chosen vice-president, and Roland Thomas of Mount Vernon re-elected secretary.

During the evening Cap. Cook of the Seattle Fire Department gave an interesting talk, and Hugh Ritter, Sauk Forest Ranger, gave a talk on forestry while showing a few reels of motion pictures.

There were thirty-eight members of the association present.

Anacortes Chamber Wants Avon Cut-Off Completed

The Anacortes chamber of commerce again started agitation for the "Avon cut-off" road this week when a committee visited the commissioners at Mount Vernon and asked that the county go ahead on the project.

The road was originally laid out to join with the up-river road from this city, through Sedro-Woolley and Burlington and direct to the Anacortes road near Fredonia, and was to be a part of the Cascade highway. The balance of the cut-off from Sedro-Woolley to Burlington and from Burlington to Avon has been completed, leaving the small part between North Avon and Fredonia still untouched.

Estimates place cost of acquiring right-of-way, grading, bridges, etc. at \$25,000.

PATRIOTIC ORATORY CONTEST, FEB. 20th

The Sixth Annual Patriotic Oratorical contest, sponsored by the local American Legion post, will be held next Tuesday evening, Feb. 20th at the High School auditorium.

Winners of each year's contest are given suitable awards for their work and also have their names engraved on the permanent plaque displayed at the high school.

Those competing this year, and the title of their talk:

Clyde Howard: "America—The World Example."

Denny McGarry: "Can The U. S. Keep Out of War?"

Emily Wolbert: "America—The Haven of Peace."

Cordelia Leavitt: "The True American."

Louise Wagoner: "America the Peace Maker."

The program will open at 8:00 p. m. and is open to all who wish to attend and hear the orators of Concrete high school in action.

In The Groove!

By Leonard Gratteri

Glenn Miller was awarded another plaque for being the most popular band in America. This time it was from the "Make-Believe Ballroom." Members of its staff figured Glenn's requests were twice as many as that of his nearest rival...Listn for Miller's recording of "Tuxedo Junction", the torrid theme of Erskine Hawkins...Alvino Rey's fine aggregation has a style well worth listening for. It's remarkable no other band has attempted to duplicate it...Bob Eberly, vocalist with Jimmy Dorsey, will soon wed...She is Florine Calahan of Broadway...Bonnie Baker may be replaced as the featured singer in "Oh Johnny, How You Can Love"...It is rumored that Betty Jane Rhodes may take her part...Jack Benny recently signed Rochester to a new 39-week contract guaranteeing him a weekly check regardless of whether he appears on the program or not...The week it went into effect he wasn't written in the script...money ahead...At the age of seven, Jan Savitt was considered a child prodigy. He amazed Victor Herbert, among others, with his violin playing to the point where he was encouraged to play strictly classical music. He studied immensely and at the age of fourteen was playing in Stokowski's Curtis Institute Orchestra. At first he was scoffed at by veteran members but he soon proved to them he could shine with the best of them. For eight years he played with Stok-

owski's orchestra. Then something happened. He began listening to popular music and it seemed to appeal to him greatly. He quit the classics and started an orchestra of his own. With his knowledge of classic styles and the love for popular combined, he created his famous "shuffle rhythms" which have rocked the Hotel Lincoln in New York since December of 1938. And so, by "robbing" the classical world of a child prodigy, the jive world obtains one of its greatest bands...Artie Shaw's knee injury is much better and so is his new band...It will be heard on regular broadcasts around April 1st. Well that's all for now...lg.

The saddest sign
on road or street—
"Concrete Ends—400 ft."

For Safety's sake
PAVE THE GAPS WITH
Concrete

WHY do state highway departments warn the public: "Concrete Pavement Ends"?

Because it is universally accepted that speeds which are reasonable and safe on concrete become dangerous on other surfaces.

To save lives to prevent accidents...demand concrete all the way.

True and even, it has no high crown—is usable to its full width. Brakes are at their best on its gritty, non-skid surface. Its light gray color and sharply defined edges give visibility at night. Any car is a better car on concrete.

And concrete saves money for motorists and for taxpayers. Insist on concrete for your roads.

Concrete's Resistance to Spring
"Break-Ups" Worth Millions
to Taxpayers Every Year

When the frost comes out or the rain pours down, concrete pavements "can take it." They're always ready to get you through with safety. Even after the terrible punishment of this winter, routine, inexpensive maintenance will quickly put concrete in condition for heavy summer traffic. Aggravating detours and costly delays are avoided.

Sunday school classes at the home of Mr. and Mrs. Albert Jennings of the Cascade Saturday evening. Many games were played and refreshments served at the close of a most enjoyable evening.

Evidently the ground hog knows the weather in his predictions as Saturday snow fell in large, fluffy flakes for about one hour, but with the rain-soaked ground it scarcely whitened it. All this week as the clouds lifted snow could be seen very low on the surrounding foothills.
