

VOLUME XXXIX

CONCRETE, SKAGIT COUNTY, WASHINGTON, JULY 13, 1950.

NUMBER 27

THIS AND THAT

By H. L. D.

We have not had any word from Celso Caranungan, the Philippine young man who visited with us last year for some time and wondered what had happened to him after he entered Columbia University last fall. Yesterday we received a newspaper from New York and find he is editor-in-chief of a bi-weekly called "Voice of Asia."

The eight-page paper is dedicated to providing a common ground for east and west, and features stories about the Philippines, Korea, China and Japan. Several of the articles were written by Celso.

Golden Wedding Anniversary

All the children and grandchildren and many of the relatives gathered at Gervais, Oregon, last week end to celebrate the golden wedding anniversary of Mr. and Mrs. Robert Mathany of this city. Mr. and Mrs. Mathany received many lovely gifts to commemorate the occasion. Two of their sons, Clinton of Wyoming and Howard of New Mexico, spent some time here this week visiting with their parents.

Return From Trip

Miss Helen Leonard and Miss Reta Crawford were visiting here over the week end with Mrs. Alice Leonard. The girls just returned from a three months' motor trip in which they visited 31 states. They traveled as far east as Maine.

While in Massachusetts they stopped at Cambridge and visited with Mr. and Mrs. Marshall Arlin and children. Marshall, who spent his boyhood here, is now head of Electronics at Wentworth College in Cambridge.

Home For Visit

Mr. and Mrs. John Smith and children spent last week end on a trip to Orofino, Idaho, to visit with their daughter, Mrs. Norman Hornbeck. On their return she accompanied them home with her son Dannie. She expects to visit here for a month.

Mrs. Heacock Entertained

Mrs. Ralph Heacock of Seaside, Oregon, spent from Friday until Sunday visiting old friends here. She was a house guest of Mrs. Helen Crinklaw but was entertained during her visit by several others.

On Thursday evening Mrs. Crinklaw entertained the Birthday Club, of which Mrs. Heacock was a member during her residence here.

Friday noon Mrs. Chas. Bagnell entertained at a luncheon a group of Mrs. Heacock's friends and on Saturday evening Mrs. Clara St. John gave a dinner in her honor.

On Sunday Mrs. Heacock's sons, Dick and Bill, drove up from Seattle and she returned home with them.

Mr. and Mrs. John Stadlman just returned from a vacation trip to Sac City, Iowa, to visit with Mrs. Kate Stadlman. While there they also visited with Mr. Stadlman's brother and sister, and with Mrs. Stadlman's two brothers and sister and with other relatives and old friends. Enroute then enjoyed Glacier National Park and Fort Peck Dam.

Mrs. Pat Ward was taken to the Bellingham hospital last week where it was found she had contracted a case of polio. The case was light and she is now out of quarantine and hopeful of an early return home.

Mr. and Mrs. Lewis Schoentrup and family and house guest Donna Haggard of Seattle spent Wednesday on a trip to White Rock, B. C.

Leaving Newhalem

Stan Kelsey and daughters Nancy and Frances, who have made their home here for the past few years, moved last week to Seattle where Stan has accepted an appointment as constructor.

SKAGIT BRIDGE NEARING THE BIDDING STAGE

Commissioners Buy Right of Way—Plans Of New Bridge Revealed.

County Commissioners Brown Wiseman and Wallace Sharpe were in the city the first of the week negotiating for right of way for the highway to the proposed bridge across the Skagit at The Dalles. To further hopes for possible construction on the bridge, a map and plan of the job has been received from the Army Engineers, asking that any protests arising from navigation standpoint be forwarded to them immediately.

This literature is the first received on the bridge and lists a 300 foot span from pier to pier with a 450 vertical curve. The width of the bridge is listed at 35'6".

The span is of steel girder construction, approximately 450 feet in total length. The span will be 19 feet above the highest flood point recorded, that of 1897; and will be 56 feet above the extreme low recorded in November, 1936. Average height above normal flow will be approximately fifty feet.

According to information of the commissioners, bids will be called during the next week on footings and approaches, with other bids being called as rapidly as they can be prepared thereafter.

Time To Register For Primary

Now that candidates are beginning to circulate around looking for votes, it is time to remind any and all residents who have not yet registered in this area that the books will close August 12th for the primaries in September.

Mrs. Leonard, City Clerk, has announced that she will be at the city hall every Thursday afternoon and each Tuesday evening from 7:30 until 10:00, until the books are closed.

'Way Back When

Concrete Herald, July 11, 1935

Another wedding in the Gardiner family occurred Sunday when Miss Edna Gardiner became the bride of Sigard Steen. The bridal couple were attended by Miss Christine Lindbeck and Ernest Steen, brother of the groom.

The plant of Superior Portland Cement, Inc. again lapsed into idleness this week for an enforced shutdown on account of insufficient business. No definite announcement has been made as to when the plant will resume operations.

H. L. Morgan of Seattle arrived in town this week to take over the Ross barber shop formerly operated by Frank Olsen. The shop is now ready for business under the name of Morgan's Barber Shop.

The new management of the Skagit River Telephone and Telegraph company took over the lines here last week and have had a crew busy since preparing to move the switchboard and office of the company to a new location in the bank building. The personnel of the company and switchboard will remain the same as under the old firm and George O'Hara will also be kept on to take care of the lines.

Mr. and Mrs. Wm. Woodworth of this city became grandparents last week with the arrival of a six and one-half pound boy to Mr. and Mrs. John Woodworth of Port Townsend.

A group of twenty men under the supervision of L. Covey arrived here Monday to start work on the federal transient camp to be installed on the school grounds at Van Horn. Truck loads of cots, mattresses and other supplies accompanied them and they are busy preparing the grounds for a full capacity of from 200 to 400 men. The camp has been named Camp Pitcheck.

BIGGER DEER KILL EXPECTED IN FALL

Hunting seasons to give Washington hunters twice as many deer as they have taken in years gone by, and this without cutting down the state's stable 400,000 deer population, were announced by the state game commission recently.

The commission has set seasons that will give hunters an estimated 100,000 deer and 7,000 elk—a figure which careful studies for five years show can be maintained and even increased in years to come.

Pre-1949 kills ran around 40,000 deer and 3,000 elk. In the same period biologists found remains showing some 60,000 deer a winter had been dying in the hills. The new seasons are set to give the hunters a chance at these deer.

Shooting of doe and cow elk has been permitted in many other states without harming the game supply and in some cases the plan has brought increases in the herds. Few hunters ever see the game range except in hunting season, so miss the sight of thousands of deer which starve and die during January, February and March. As a matter of record, the game department found 10 dead deer to the square mile last winter—in an area where hunters kill but two deer per mile.

Biologists say that if deer are given sufficient range they will double their population every three years. This means that Washington's deer population could have been 1,600,000 at the present time if starvation had not cut the figure down to a constant 400,000.

The state is buying large areas of range lands to supplement the wintering areas. These are expected to aid in natural increase of the state's deer.

Legion Post To Set Up Aircraft Warning Service

The local American Legion Post, in co-operation with the State Patrol, are engaged in setting up an aircraft spotter unit here, to be alerted in case of an emergency. The unit will be prepared under the direction of George George, Post adjutant, and is to be in operation within two weeks.

TWO HOME GAMES THIS WEEK END

The Whidby Island game was rained out last Friday night so the Nighthawks had to take a rest instead of trying to give the sailors a baseball lesson.

This week the team has scheduled two games, one Friday night at 8:00 against the Arlington team; and the second Sunday afternoon with Lopez Island as the opponent.

Mrs. Ralph Cunningham of Seattle spent the past week at the home of Mr. and Mrs. C. P. Cunningham.

Ovenell Plane Solves Ferry Difficulties

High water in the Skagit gives a big boom to the local airport. High water shuts down the Concrete ferry, which leaves the residents of the south side of the river without a way of getting out.

The Ovenell family solved the problem neatly by flying their plane back and forth to town for mail and to accommodate neighbors who found it necessary to cross over.

Last week end a crew of surveyors were caught on the south bank, and it looked like a long and hungry week end for them until the Ovenells ferried them across by air—six trips. It takes just seven and a half minutes to make the jump across, mostly takoff and landing.

MORE FILINGS FOR POLITICAL POSTS

Political filings continued at the court house in Mount Vernon and in Olympia with a number of new and old candidates joining in the race for approval of the voters at the September primaries.

Of county interest was the filing of George E. Peth of Route 1, Mt. Vernon on the Republican ticket against Wallace Sharpe for county commissioner. Sharpe is present member of the board.

New filing for state representative include Violet P. Boede (D) of Orcas Island and Ed Schwartz (R) of Anacortes.

Payson Peterson of Snohomish will make it 11 times in a row in his filing for Congress as representative from the 2nd district. He has run ten times unsuccessfully as Republican candidate. Henry M. Jackson is the Democratic candidate.

Getting down to the local level, J. J. McDonald has filed as justice of the peace.

To Rebuild Forest Trails

Good news for hikers! Funds for a five-year program of reconstruction of the trails of the Mt. Baker National Forest were allocated last week and crews will start soon to clear away the heavy damage of the past two winters that had closed nearly all the the familiar foot and horse-pack trails around here.

There are three categories of trail work now under way. One is the annual trail maintenance program, another is snow damage repair and the third is a long-range betterment program.

Each of the six ranger districts will have from two to three crews on this work. The late spring has delayed much of the program, and snow is still keeping crews out of some places, such as Schriber's meadow and Mazama Park.

DENTIST LOOKS OVER COMMUNITY

Dr. George Galtwald, graduate of Tufts College of Boston, Mass., was in town last week end looking over the area as a prospective location for a dental office. While here he was a guest of James J. Prendergast.

Friday evening Dr. Galtwald was entertained at a buffet luncheon at the home of Dr. and Mrs. R. R. Rueb. Present were Mr. and Mrs. Walter Ross, Mr. and Mrs. H. E. Thompson, Dr. and Mrs. Richard Hoag, Mrs. Ellenberger, James J. Prendergast and Geo. Nims.

Dr. Galtwald became interested in this location through efforts of the P. T. A., who have been endeavoring to secure a dentist here. He will be employed at the Northern State Hospital for the next few weeks, after which he will make his decision.

O. L. Ness Dies Sunday

O. L. Ness, well-known resident of Rockport who has been ill for the past year, passed away Sunday afternoon at Sedro-Woolley. Mr. Ness had been district office superintendent for City Light at the Rockport terminal for the past 18 years and in that time had made a host of friends all through the valley.

Funeral services were held at the Lemley chapel in Sedro-Woolley Wednesday. Cremation followed at Bellingham. The services were conducted by the Masonic Lodge of Sedro-Woolley. Mr. Ness was a member of the Roosevelt lodge in Seattle.

Olaf L. Ness was born in Molde, Norway, April 29, 1886. He came to this country as a boy of 18. He is survived by his wife, Gladys; and one brother living in Norway.

Local Man Arrested After Highway Car Accident

Earl Spurling of Concrete was arrested last Saturday afternoon on a charge of negligent driving and having no operator's license after his car plowed into the rear of another car on highway 99, just south of Burlington.

The car ahead, driven by Wm. Dennis of Santa Ana, Cal. had slowed down for heavy traffic when it was hit from behind by the Spurling car, driving it into the car ahead. The Spurling car then went into the ditch on the right side of the road and sideswiped a telephone pole.

Mrs. Dorothy Dennis was hospitalized with neck and back injuries and Spurling and Frank Lundy were also injured. The Dennis car received \$400 damage, \$150 to Spurlings and \$50 to the other car in the accident.

HIGH SCHOOL BID \$48 000 OVER BUILDING FUND

Bids Total \$650,861 While \$602,000 Is Total Cash For All Purposes.

Bids on the proposed new high school building for Concrete were opened Monday evening at the high school auditorium, but once again the amount of the bids totalled more than the money the district has on hand for the purpose.

The total of the lowest bids for the complete building was \$650,861. The building fund contains \$602,000—leaving a sum of \$48,861 lacking to erect the building. This leaves nothing to furnish and equip the rooms.

Low bidder on the building itself was F. C. Toepel Construction Co. of Mount Vernon, whose basic price was \$433,000. The low bid on plumbing was offered by A. J. Blythe Plumbing and Heating of Bellingham who bid \$117,725.00. A low bid of \$40,967.00 was received from F. & F. Electric Co. of Everett for the wiring.

There were four bidders on the construction job: Sound Construction Co. of Seattle, \$475,337; Chisholm & Elford of Bellingham, \$467,900; Henrik Valle Co., Inc. of Seattle, \$484,740; and the low bidder.

Besides the basic bid, there were twelve alternate bids for leaving off various items such as painting, aluminum sash, etc. Largest of the alternate slashes were for leaving off lunchrooms (bids ranging \$3,300 to \$6,100 deduction) and omitting swimming pool (deductions of from \$10,000 to \$31,307).

Due to the complexity of the bids the board made no selection of preferred bidders Monday night, and in view of the lack of funds to complete the building as specifications now stand, could let no contracts.

The local building program was first started in 1941 when funds were voted for a swimming pool and gymnasium. A call for bids found the \$69,000 then available insufficient. Funds were again voted in 1946 with the same result. Last year a final levy was made to combine the gym and pool with an entirely new high school plant.

REBEKAH PICNIC

Concrete Rebekah Lodge plan to hold their annual picnic for members and their families on Sunday, July 23rd at the Mount Vernon Hillcrest Park. Everyone attending is asked to meet at the I. O. O. F. Hall at 10:45 that morning.

All members having room for passengers in their cars and all members in need of rides are asked to contact one of the transportation committee. They are Blanche Craft, Ida V. McDonough, Jessie Roller and June Turner.

Mr. and Mrs. Fred Komar and Mr. and Mrs. Robert Komar of Birdsview visited Monday at the home of Mr. and Mrs. Earl Ellenberger.

NATIONAL FOREST NOTES

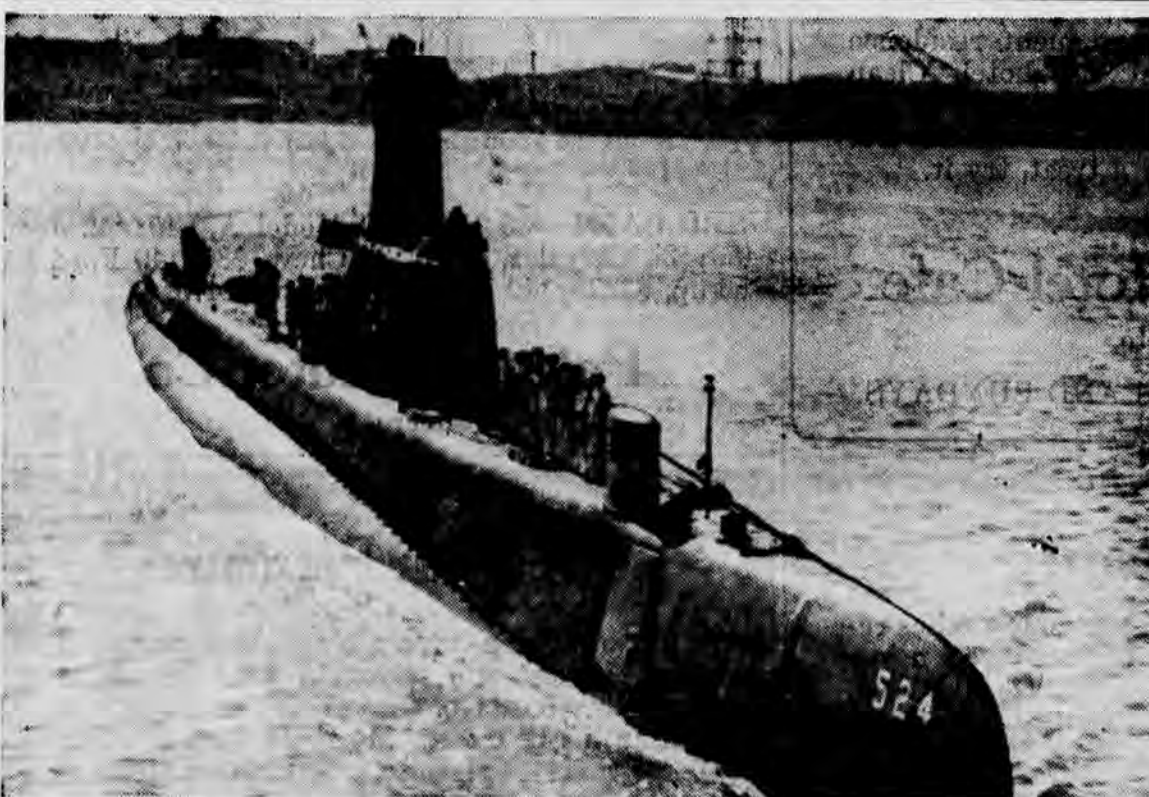

By Fritz Moiso

Forest Ranger, Skagit Ranger Dist.

Fishing in the Upper Skagit continues to be poor. Although recent cold weather has slowed the runoff in the streams to some extent, fishing will not improve until the flow becomes normal—maybe in August. The Cascade River and lateral streams are usually late and may not be ready until September.

The mine-to-market road up the Cascade River is now open to its terminal. The county has replaced the washed-out bridges and has repaired the road to make it passable. The opening of this road makes three prospective timber sale areas accessible and ready to be advertised in the very near future.

Project timber survey crews are being organized on the Forest. The crews will make road location surveys and cruise areas of bug killed timber in the Deer and Finney creek watersheds.

SETS UNDERWATER RECORD . . . The navy announces that the U.S. snorkel-type submarine Pickerel has set a record for underwater operations by traveling submerged from Hong-Kong to Pearl Harbor, a distance of 5,200 miles. The Pickerel remained submerged for 21 days while making the record run. It sailed from Hong Kong on March 15 and surfaced in Pearl Harbor April 5, having traveled at an average speed of slightly over 10.3 land miles per hour. The snorkel device is essentially a breathing tube which enables submarines to take in air for their diesel engines while submerged. Non-snorkel submarines can operate on diesel engines only while fully submerged.

Entered at Concrete Postoffice as Second Class Mail Matter

The opening of the bids for a new high school building Monday evening appears to be just another chapter in a volume of disappointments. Once again the amount of the bid exceeded the amount of money available. This time, however, there rises the question of doubt as to the necessity of overstepping the budget. Evidently there was no attempt made to build a high school plant that we could pay for and still have enough money left to equip. Every available cent of building money was used as a figure with which to plan the building and the natural tendency is always to exceed the estimate. After so many years of handling our building fund, the board could have called upon past experience for this knowledge. Such errors are costly, and unnecessary. Now we are faced with the necessity of raising more money, or revising our plans. The question of more money is bound to meet with a resounding "No!" There is an end to patience and generosity and we believe this has been reached. From now on there must be a quick return from the realms of rosy dreams to a practical solution on the basis of cash in hand. The joy ride is over and it is time for action—and results.

Memories of rationing during the first part of the present war (formerly called World War II) are emptying stock piles of usual items. New cars are selling like pop-corn, sugar is looked upon as diamond dust, and some folks are even wondering just where they stored that cigarette rolling machine. Maybe it won't be a long skirmish this time, but the folks on the home front are battle-wise and are going to be hard to fool on the old booby-traps.

Along with other regulations of filing for office they should include one requiring each candidate to use a campaign photo taken less than ten years before. It's so disturbing to vote for a young, vigorous face and have the elected counterpart turn out to be an old fuddy-duddy with a gray beard.

Now that we may add two stars to the flag, we might just as well go all out and change the name of our country to the United States of Emergency.

Adam, the first taxpayer, came equipped with no pockets. Man, the joker, invented them.

In making our alterations we find a lot of slow moving items on our hardware side. To clear these we have marked them down 1/2 or more. Possibly you could find some articles you can use.

CAMP FIRE GIRL NEWS

By Geraldine Enick

Last week end the Camp Fire Girls were invited up to Koma Kulshan by Mr. and Mrs. Boulton. When they first got up there they decided they would cook dinner outdoors and take a walk up the Park Creek trail to the Sulphur Springs, but only got a far as the falls because it was so wet. It was just like swimming through the meadow. Everyone was wet from head to toe except Sharon Gross, who was smart and brought her rain coat.

When they got back to Koma Kulshan they finally dried off and roasted marshmallows, if not themselves.

During the night they slept out in the garage in sleeping bags with bats flying around and mice crawling inside of Jackie and Barbara's sleeping bags. They told ghost stories and about scared each other out of their wits. They chased Gwen Boulton out of the garage and into the house by making too much noise and about drove Geraldine Enick crazy by not letting her go to sleep. Geraldine finally went to sleep in spite of them. The

rest of the girls went to sleep about five o'clock in the morning and got up about nine o'clock.

After breakfast the girls went to the swinging bridge at Anderson Creek. When they came back to Koma Kulshan they went down to the falls and went swimming and wading. They went out on the rocks under the falls and let the spray fall on them.

During the evening they had a short ceremonial and played games and sang songs. They had a very wonderful week end and want to thank Mr. and Mrs. Boulton.

Those making the trip were Mrs. Ellengerber, leader, Barbara Arnold, Kathleen Boulton, Geraldine Enick, Sharon Gross, Ann Roundy, Jackie Tasky, Mr. Ellengerber, the Boulton family and Bill Mead were also present.

Mr. and Mrs. John West of Sedro-Woolley were callers at the Floyd Roller home Wednesday. The twins returned home with them.

PLAYTHINGS

Play is really a child's work, his way of learning about the world in which he lives. Toys are the child's tools of play, and play a significant part in his daily living.

When you buy toys for your child or grandchild, stop and think of what a toy is and what it means to him. Everything with which a child plays, contributes to his growing fund of knowledge and to his curiosity.

Toys should be selected to suit the child's stage of development. Some children will be ready for skates before another, just as one child will walk before another. Toys should meet the child's changing physical and mental abilities as well as give him a variety of experiences.

Well-rounded play helps develop well-rounded personality. To aid in development of well-rounded play the child at one time or another should have some toys from each of several groups. From year to year, you will want to get toys for developing coordination, physical strength, and skill; for constructive and creative play; for social development; for artistic development (arts and crafts); for stimulating knowledge and aiding in school work; for developing an interest in science; and for hobbies and special interest.

Toys do not need to be expensive to be suitable. Many toys can be made at home that will be both practical and gay. Toys should be well made so that they will stand hard usage.

During the first year, the child should have objects to look at, listen to, bite, shake, hold, drop. When choosing toys pick different shapes and textures. Look for rounded edges, bright colors, washable materials, hard finishes of paints which do not chip and are not harmful if chewed. Make sure there are no loose pins, eyes or springs.

During his second year the child likes toys to push or pull, to fit together, to pile up and knock down, to pound and throw.

During his third year, dramatic and imaginative play begins. Active physical play begins to become important to the child.

By the time a child is six, he begins to like to play with other children. He becomes interested in make believe and uses anything for physical activity. At about eight years of age the child will develop special interests, hobbies and aptitudes.

Interest at this age will shift rapidly.

Besides having the proper play equipment, children should have a place to play wherever the mother is occupied. The child also should have a drawer or a shelf in which to keep his possessions.

Make every dollar you spend for playthings bring its own reward in the wholesome development and lasting happiness of your own children.

Facts About Utah

Utah is planning giant dams to increase its electric power. The state will probably take a leading part in the production of synthetic fuel from its tremendous coal reserves extending for 13 thousand square miles. The resins contained in Utah's Huntington and Salina Canyon coals already go into lacquers and varnishes. Utah is the world's only producer of gilsonite, wurtzite, and ozokerite, or natural beeswax. With Colorado, it produces virtually all United States uranium and has enormous deposits of potash and phosphorus, vital fertilizer constituents. From its Great Salt Lake comes an important supply of salt. By itself, it is estimated, Utah could supply the world for 1,000 years with commercial gypsum.

Chromium

The amount of chromium in stainless steel varies from 11½ per cent to 30 per cent. It is the chromium that prevents stains, rust and scale.

Marblemount

Miss Shirley Rowland visited over the week end at her home.

Len Scott of Ross Lake visited with his family over the week end.

Mrs. Barbara Simmington of Blaine is visiting with old friends in Marblemount.

Mr. and Mrs. Clarence Blair of Seattle visited last week at the Max Scott home.

Mr. and Mrs. Frank Sprague spent the week end with friends at Marysville.

Mr. and Mrs. Mervyn Peterson and Lynn were in Seattle Wednesday.

Mr. and Mrs. Max Scott and sons, Mr. and Mrs. Melvin McLeod and son visited Saturday evening at the Mervyn Peterson home.

William Eckart and daughter Hueda of Seattle visited over the week end at the O. S. Witham home.

Mrs. Loren Lemon and sons drove over to Idaho last week end for a visit at the home of Mr. and Mrs. Joe Lepo.

Mrs. Frank Sprague entertained the bridge club Thursday, high score going to Mrs. Vashti Hooper and low to Mrs. Hazel Tracy.

Mr. and Mrs. Russ Uttley visited last week in Seattle. Mr. Uttley's mother returned to Marblemount with them.

Mr. and Mrs. Wm. Garling and children of Wickersham and Mrs. Mary McLeod of Rockport were

dinner guests Sunday at the home of Mr. and Mrs. Melvin McLeod.

Mr. and Mrs. Len Scott and children made a trip to Seattle Saturday to meet Mrs. Scott's brother, Herman Driscoll of Texas, who will visit here for a while.

Passengers

Pullman passengers use annually about 65,000 gallons of liquid soap and more than 1,100,000 bars of soap.

Shipment of Acids

Corrosion-resistant stainless steel drums now are used to ship acids and other chemicals in solid or liquid form.

Apple Storage

Covered barrels or boxes are recommended as containers for the storage of apples.

Hard Pears

If pears found on the markets are hard to the touch, ripen them at home by keeping them at room temperature — 60-70 degrees—with some moisture to prevent shriveling.

Quick Silver

Oregon has one of the only two United States producing quicksilver mines.

Free Lithia Water

Lithia water is dispensed free in downtown Ashland in southern Oregon. Mineral water is piped from springs to a large refrigerated fountain on the city plaza.

Rest Period for Cows

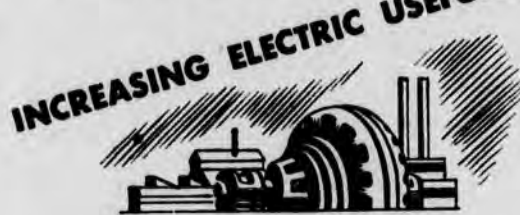

High-producing milk cows should be given a rest period of six to eight weeks before freshening.

The FORTIES

A DECADE OF INCREASING ELECTRIC USEFULNESS

In 1940 the average Puget Power residential customer used 1,444 KWH of electricity. In 1949 our residential customers used an average of 4,329 KWH—an increase of 200%. This was more than 2½ times the amount of electricity used by the average residential customer elsewhere in the United States during 1949. Yes, the usefulness of electricity has grown by leaps and bounds, making life easier and more enjoyable in the home and on the farm. But these startling gains bring problems of supply and service. To stay ahead—to keep moving forward, the critical power problems in this region must soon be fairly resolved.

A DECADE

OF LOAD INCREASE

More people, more business, more industry—our whole Puget Sound area has enjoyed tremendous expansion during the decade of "The Forties." Despite the loss of about 120,000 kilowatts of load to public agencies during the past few years, Puget's peak load in December 1949 was 78% GREATER than the 1940 prewar peak demand.

A DECADE OF DECLINING ELECTRIC RATES

In a decade of war, rising costs increased problems and uncertainty, the average price you paid for Puget Power kilowatt hours delivered to your home or farm maintained a steady downward trend... from an average of 2.4c per KWH in 1940 to 1.3c in 1949... a decrease of 46%. Today Puget Power's average revenue per kilowatt-hour is less than half the national average. Yes, we're a long way out in front. To stay there the critical power problems in this area must be promptly and fairly resolved.

A DECADE OF RISING TAXES

All of us are familiar with what has happened to our tax bills during the past 10 years. During "the forties" Puget Power [Parent company only] paid a total of more than \$40,000,000 IN TAXES, WHICH WAS MORE THAN 2½ TIMES THE AMOUNT PAID DURING "THE THIRTIES." Our 1949 tax bill which totaled ALMOST \$6,000,000 WAS OVER TWICE AS MUCH AS THE TAXES PAID IN 1940.

Life in Prison Can Be 'Funny,' One Girl Claims

NOTRE DAME, IND. — Life in prison?

Aw, it's not so terrible. But that depends upon which side of the bars you may be. However, life in prison can be very funny, according to an inmate of Stateville prison at Joliet, Ill.

The "inmate" referred to is a tall blonde of 21 with a slow smile and soft voice. She is Jane Ragen, and why life in prison may not be so tough for her is due to the fact that she is the daughter of Joseph Ragen, the warden at Stateville. She is a senior at St. Mary's college here.

There's nothing really unusual about her home life, Jane asserts. A police guard or two outside the Ragen apartment, meals cooked and served by convicts, wardens and other minions of the law as frequent house guests—but nothing unusual.

"It's just ordinary to us," says the girl who has spent her life in prison.

Jane and her brother, Bill, a 20 year old student at St. Ambrose college in Davenport, Iowa, were born and brought up inside prison walls.

Mother Went as Bride
With a straight face, Jane explains, "my mother went to prison as a bride."

For the last 15 years, the Ragens have lived in their 10 room apartment in the administration building at Stateville. Previous to 1935, Ragen was warden at Menard prison in Chester, Ill.

Not that living inside prison gates put a damper on Jane's childhood. She and Bill played cops and robbers in back of the prison with the neighborhood kids with just as much zest and more authenticity than most. Their wooden guns were handmade for them by the convicts.

The convicts were good to the children, Jane recalls. Bill, in his preschool days, had one favorite who dressed and undressed him each morning and evening. No one else could touch him.

The day this convict was to be released on parole, Mr. and Mrs. Ragen took a short trip. The convict requested leave to stay on in prison until the Ragens returned. For who would dress Bill if he wasn't there?

Jane, who is majoring in English and minoring in journalism at St. Mary's college, says her main ambition, in addition to working on a newspaper, is to write a book about life in prison. It will be a comedy.

Except for the time that James Stewart, Richard Conte and Lee J. Cobb were dinner guests of the Ragens during the filming of "Call

Northside 777" at Stateville, Jane says prison life isn't too exciting.

No Spectacular Breaks

There haven't been any spectacular prison breaks as far back as Jane can remember.

"There may have been a couple of attempts, but mother and I were always in Chicago, shopping, when they happened."

The only time Jane can recall coming near a prison "break" was the night at dinner her mother was describing an expensive tablecloth she had seen that day in Chicago. One of the waiters, a Texan who was in prison because of an affinity for other people's belongings, hovered over the table, listening closely to Mrs. Ragen.

Finally he leaned over confidentially and said, "Well, now, Mrs. Ragen, if you'll just let me out for a day, I'll be glad to get that tablecloth for you."

Mrs. Ragen refused the offer. But it gave Jane the idea for a comedy on prison life. And, when you think about it, it's not a bad idea.

Pen Leaks in Plane

A fountain pen is likely to leak in an airplane because there is always some air inside the pen, above the ink, at the same pressure as the air outside. As you ascend the surrounding air pressure becomes less and the air in the pen expands to equal it. If the pen is in a handbag, for example, with the point downward, or even if the point is upwards and a drop of ink has been entrapped in the nib, the expanding air inside may push the ink out.

From "Darkest Africa"

Palm oil, from the fruit clusters gathered by African natives, is important in the manufacture of tin plate.

Newhalem

Bud Glover of Rockport was transacting business here Tuesday.

Wayne Smith made a business trip to Seattle on Wednesday.

Joe Hummel spent several days this week visiting with friends in Seattle.

Mrs. W. Campbell of Seattle spent several days last week visiting with friends here.

Fred and Lloyd Hooper of Marblemount were visitors here Wednesday evening.

Mr. and Mrs. R. W. Gordon and family spent the week end with relatives in Seattle.

Mr. and Mrs. Leonard Gowan and son Raymond spent the Fourth at the beaches around Bellingham.

Mr. and Mrs. Herb Smart of Seattle spent a few days last week with Mr. and Mrs. Bucknell.

Mr. and Mrs. George McAdams of Seattle spent the week end with Mr. and Mrs. Dale Higgins.

Miss Helen Chase of Seattle spent a few days last week with Mr. and Mrs. Cal Rodine.

Mr. and Mrs. Roy Creed and family are spending several days with relatives in Spokane.

Mr. and Mrs. Tom Larsen are spending their vacation visiting in North Dakota.

Supt. E. R. Hoffman and assistant Ira Cotton of Seattle were attending to business interests here last week.

Mr. and Mrs. Otto Phine of Diablo are spending several days visiting with relatives in Long Beach, Washington.

From where I sit... by Joe Marsh

There it Was—
Right in The Middle!

Easy Roberts mowed his lawn early last Saturday. Then he sat on the porch, and watched Handy Peterson cutting his grass.

The Roberts' property and the Peterson's border each other—with no hedge or fence between them. So, when Easy notices Handy had left about a four-foot strip unmowed along the boundary, he walks over and asks why.

"That's your land," says Handy. "Mine ends here. See, it lines up with that oak tree across the road!" Easy didn't think so, so they went up and down looking for

the surveyor's marker. Where did they find it? Right in the middle of their "no man's land!"

Well, they both grin and take turns finishing the job and then retreat to Easy's for a friendly glass of beer together. From where I sit, a little searching around for the truth of the matter often shows that the other fellow is as much right as you are—at which point the whole thing doesn't seem as important anyway.

Joe Marsh

CONCRETE ROADS

Serve for Many Years

At Low Annual Cost

Concrete pavements generally carry the heaviest traffic. Yet their annual maintenance cost is far lower than any other pavement intended for similar service. And the rugged strength and stamina of concrete assure long life — many years of all-weather service without interruptions or frequent repairs or re-building. Compare construction costs

too, and you'll find that concrete pavement usually costs less to build than any other pavement of equal load-carrying capacity.

So with long life, low maintenance expense and economical first cost, concrete is easily the best investment for motorists' gasoline tax money, assuring as it does, low annual cost — the true measure of pavement economy.

FOREST CLOSURE NOTICE

The following described areas within and adjacent to the Mt. Baker National Forest are hereby declared: REGIONS OF EXTRA FIRE HAZARD. Straight Creek Area: SW 1/4 Section 16, SE 1/4 Section 17, E 1/2 Section 20, W 1/2 Section 21, T. 32 N., R. 11 E. Boulder Ridge Area: That part of Section 20 lying south of French Creek Road, W 1/2 Section 21, T. 32 N., R. 8 E. North Fork Stillaguamish Area: S 1/2 Section 11, Section 14, E 1/2 Section 22, Sections 23, 27, 33, 34, E 1/2 Section 32, SW 1/4 Section 35, T. 33 N., R. 9 E.; E 1/2 and NW 1/4 Section 2, N 1/2 Section 3, N 1/2 Section 4, T. 32 N., R. 9 E. Dans Creek Area: S 1/2 Section 26, that part of Section 35 east of Dans Creek Road, NW 1/4 Section 35, Section 36, T. 32 N., R. 10 E.; Section 1, that part of Section 2 east of Dans Creek Road, NE 1/4 Section 12, T. 31 N., R. 10 E.; Sections 6 and 7, T. 31 N., R. 11 E. Falls Creek Area: Section 23, that part of Section 24 south of Falls Creek Road, Section 25, T. 31 N., R. 10 E.; that part of Section 30 west of Sauk River, W 1/2 Section 31, T. 31 N., R. 11 E.; NW 1/4 Section 6, T. 30 N., R. 11 E.; 1/4 N Section 1, T. 30 N., R. 10 E. Glacier Area: Sections 23 to 26 inclusive, T. 39 N., R. 6 E.; Section 7, S 1/2 Sections 8, 9, Sections 16 to 21 inclusive, 28, 29, 30, 34, T. 39 N., R. 7 E. For protection of the above described areas against fire, the following rule will be enforced: Going into these areas or being upon the lands described is prohibited except with an entry permit issued by a forest officer, and as provided by law. The permit shall be in the possession of the permittee while he is within the closed area. Entry shall be restricted to permanent residents and others engaged in conducting a regular, legitimate business, such as industrial operations, public works or facilities, livestock raising, mining, and protection of the resources. Those entering shall be restricted to carrying on their business and to going to and from their places of business and their homes or places of abode; also to travel during daylight hours when so stipulated in their permits. Violators of the foregoing rule are subject to fine of \$10.00 or \$100.00 or 90 days in jail, or both. Effect-

ive from July 12, 1950 to October 15, 1950. Closure requested by United States Forest Service. /s: J. V. Rogers, Director, Department of Conservation and Development, State of Washington.
