Memorial services were held yesterday afternoon, Feb. 24, at the Hulbush Chapel in Burling-ton. Cremation was held at the Hawthorne Lawn Crematory in

# **School Patrons Ask Questions At Special Meeting On Proposed Bonding**

The special school meeting held last Friday at the Concrete High School was attended by at least 30 local residents who received answers to their questions about the proposed bond proposition for a new grade school.

The school architects retained for plans and estimates, William Arild Johnson & Associates of Everett, were unable to be pre-sent because of an earlier commitment

Supt. Fred Culbertson and school board members responded to individual questions regarding tentative plans.

In answer to a question on the student lounge, listed in the building proposal, it was explained that the lounge had only been discussed tentatively for the high school and seventh and eighth grades, and would not be put in the building program.

A covered play area to protect children outside in inclement

weather could be included grade school plans, if desired.

Sliding bleachers would be used for seating in the grade school gymnasium, and folded out

school gymnasium, and tolded out of the way for other activities. Seventh and eighth grades would be included in the new building. However, these grades would be separate from the other grades.

The new building would consist of 20 classrooms to accommodate 370 students, in grades from first through eighth. Supt. Culbertson said that 12 rooms now are in use in the present grade school buildings. Present needs are for 16 with four more for expansion in the next few

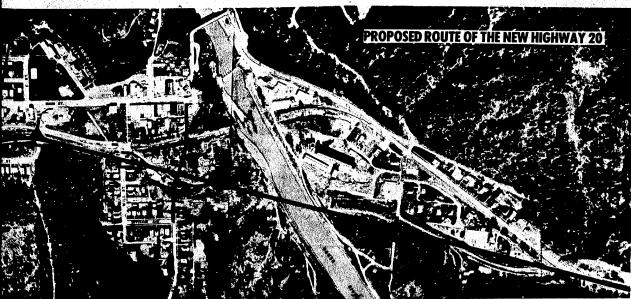

In answer to a question for concrete building plans, Supt. Culbertson said that plans and drawings and estimated costs will be presented by the architects at a special meeting, March 5, 8 p.m., in the high school.

In outlining procedures in a building program, Supt. Culbert-son said that the first step is to make a decision of the definite need for a new school; second, is the hiring of a school architect by the school board; third, find out what the district would like to have as the building program; fourth, direct the architect to draw up figures as a framework to work with (usually over-esti-mated so that there will be a suf-ficient amount to cover all needs); fifth, put the program before the people through the local newspaper, discussions by board members and the lay committee; sixth, place the proposition on school ballot.

### SPECIAL SCHOOL MEET WILL BE NEXT THURSDAY

Plans for the proposed new Concrete grade school plant will be presented by the school archi-tects next Thursday, March 5, at 5 p.m. in the high school at a special meeting of the school at a special meeting of the school board and the Lay Committee.

through the town of as shown on the map approved by the Town in a special hearing last evening with state highineers. A previous plan, only one access to the rt of town, had been rethe council at an earlier The new plans call for a two-lane highway to begin at the ex-isting State Highway 20 at D street and continue on a new alignment to the east city limits. Except for the slight curves ne-cessary at each end where the new road will join the present highway, the right-of-way will be on a straight line and the new Baker bridge built on this angle

rather than at right angles across the river. This will mean a longer bridge and a difference in cost,

bridge and a directence in cost, but a direct route all the way.

Access to Main Street will be made at E Street, the present outlet at Kenny's corner; and a new outlet from the highway to the narrow street running south from city hall. This street will intersect the man highway and continue on the new highway and continue on

to give access to Mill and Crofoot additions by way of Garden

Short Avenue (Capitol Hill) will be closed to access at E Street, but will be open to the highway at the west end. Aldridge Street, now called South Baker and known as depot hill, will be dead-ended at the railroad tracks. Mill Street, on the other side of

the new right-of-way, will also be dead-ended for automobile traffic. A foot-traffic crossing will be provided at this point.

In East Concrete there will be an access intersection on Everett Avenue below the Shell Oil plant, giving a crossing both for East Concrete residents and river ac-cess to the south, The present (Continued on page 4)
